I actually really enjoyed this game despite having some issues when I attempted to speedrun it. The issue I ran into was that I think I was ahead of where the game thought I would be at a certain point and the game just didn't know what to do so it ended up locking me in the elevator and wouldn't let me leave or go up so I had to kill the speedrun.

But for my regular playthrough, everything went fine and I really enjoyed my time with it. You basically just visit each floor and try to find the button for the elevator (each button you find let's you go up one more floor). Each floor also holds a piece of the puzzle/a part of the mystery that you unravel as you go. I'm not going to give away the plot but I did enjoy it. The ending doesn't stick the landing as well as I'd hoped but it's still not bad. I've seen WAY worse on Steam.

If you're on the fence and still not sure if you want to try it, I uploaded my regular playthrough to Youtube so you can check that out and see if it's something you think you might like:
