This is a 3D platformer/brawler aimed at children. Control a cartoony dinosaur over 3D islands, fighting crabs and things and collecting meat and shiny things. Get to the end of each level to progress to the next.

The game is console ported and was never a AAA title. The camera angles are often frustratingly bad. The graphics are primitive but acceptable enough, with support for 4K and a few other graphics settings, so this is a plus. Ultimately that leaves gameplay which is a little clunky feeling and not overall great. While this might be nice for young kids to play there's no appeal here for most gamers, especially on PC. I don't think I can recommend this.. This game is kinda quirky. I had a good time with it, if you like crash and you love this. here is just an opener for it.

[.I'm the person who probably spent the most time in this game excluding creators :p What can I say?](#)

[Tiny Hands Adventure has very nice colorful graphics. you can immediately see the inspiration of Crash Bandicoot \( while entries to levels remind me of "Donald Duck: Goin' Quackers" \). Levels are quite diverse. some of them are as if duplicated. but it is not tedious. the levels are pleasant. Big + for bosses](#)

[Game is great for speedrun which I was particularly interested in when buying. but for normal playing it is also nice. Maybe it's just a bit too short. but you can still fight in the same places for skins for the character](#)

[Minuses of this game is the automatic camera. some opponents aren't disturbing us enough. Also. the animation of mechanical hands when we interact is terrible... especially the last one should be repaired one day](#)

[Nowadays we have a deficit of such 3D platformers. I think I already know the game fully so I can give it an 8/10 rating. Congrats for Funware](#)
